Texas Department of Transportation
Ranch to Market 2828, Bandera County

Travelers along this nine-mile section of RM 2828 in Bandera County are treated to many scenic views. The road also serves as a minor connector between two major northern roadways in the county (SH 173 to SH 16), offering an alternate route from Medina to Kerrville or Bandera. It carries an average of 1,000 vehicles per day.

RM 2828 was built on a good subgrade with a 6-inch flexible base followed by a 0.5-inch-thick, two-course surface treatment. It was opened to traffic in 1968.

The only maintenance it has required since that time were seal coats in 1995 and 2003. One factor in its longevity may be the area’s mild climate, which means the road is not stressed by freeze-thaw conditions.
