SOME THINGS ACTUALLY GET BETTER WITH AGE – INCLUDING ASPHALT PERPETUAL PAVEMENTS.

The pavement structure lasts indefinitely. Every 18 to 20 years, the surface is milled up and recycled; an overlay is placed during off-peak hours; and road users get a good-as-new highway. There’s no need for the entire highway to be removed and replaced from the ground up. A pavement that remains a permanent asset. A pavement that our grandchildren’s grandchildren will be able to use. A pavement that’s infinitely reclaimable, reusable, and renewable.

Think smart. Decide diligently. Perpetual pavements make sense.

ASPHALT. AGE 59

The New Jersey Turnpike won the very first Perpetual Pavement Award back in 2001. Now, 59 years after the Turnpike opened, it’s still going strong – with no structural failures ever. Congratulations to the New Jersey Turnpike Authority on a pavement that has stood the test of time.
